DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-6 and 8-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 4 recites the limitation "the optical signal" in line 5. There is insufficient antecedent basis for this limitation in the claim.
4. Furthermore, one of skill in the art cannot determine the structure of the claimed invention due to the repeated use of terminology such as: "a plurality of optical signal transmission substrates", "other optical signal transmission substrates", "the substrate", "the respective substrates", etc. as in claim 4 for example. For example, when in line 8, referring to "the substrate", it is unclear is the applicant is referring back to one of "a plurality of optical signal transmission substrates" or "other optical signal transmission substrates". The applicant should employ terminology that more clearly distinguishes between layers of substrates in the claim. The use of "other substrates" is particularly, indefinite and unclear as it is used in the applicant's claims. The applicant should clarify similar terminology in the dependent claims.
